

Yahya KACEM

http://yahya_kacem.netcv.com

Full-stack developer

Objectives

getting integrated in a development team of high competence and participate actively in highly advanced projects, to improve individual and team performance,
I'm leaning toward a full stack development at the moment, but open to other choices.
I'll always prefer open source technologies.

Professional Experiences

Full-stack developer BornTech

Full-stack developer working on backend code with nodets front-end code with angular and mobile currently with nativescript, may move to flutter.

Since February 2020
ariana - Tunisia
